

VS-5A and VS-10A Controller

VARIABLE SPEED

Description

ZOO Fans' Variable Speed Controller is a Triac based controller to control the speed of ZOO Fans.

Typical Specifications

Controller shall be a Triac based wall-mounted controller with 115V input. Controller shall be designed specifically for PSC AC motors. Controller must mount in a standard 4 X 2 electrical job box. The controller must contain an on/off line switch, a high gain RFI noise suppression filter, an adjustable trimpot to set the minimum speed, and a flame retardant ABS enclosure.

Installation Hardware Included

- > Installation Screws and Wire Nuts
- > Cover Plate and Screws
- > Control Knob
